# IWC SCHAFFHAUSEN COMPLETES THE PILOT'S WATCH MARK XX COLLECTION WITH FOUR NEW MODELS

---

Schaffhausen, 4<sup>th</sup> October 2022: IWC Schaffhausen completes the Mark XX collection with new versions in stainless steel. The full line-up now includes black, blue, and green dial variations. The watches are available either with calfskin straps or with a new high-grade five-link stainless steel bracelet, which is highly comfortable to wear. The Mark XX is the latest addition to the Mark series. These models hark back to the legendary Mark 11 developed for the British Royal Air Force in 1948.

The fascination with Pilot's watches is rooted in their functional, purist design in the style of an easy-to-read cockpit instrument. Moreover, the unique history of these timepieces continues to inspire people today. IWC's Pilot's watches were initially conceived as precision instruments for celestial navigation. Pilots used them with a sextant to determine their position during visual flights. Hardly any other model embodies this history like the Mark from IWC. The latest addition to the series is the Pilot's Watch Mark XX. It continues the lineage started by the Mark 11, a precise and anti-magnetic instrument watch IWC developed in 1948 for pilots and navigators of the British Royal Air Force and which remained in service well until the 1980s.

The **Pilot's Watch Mark XX** (Ref. IW3282) features a robust and corrosion-resistant stainless steel case with a diameter of 40 millimetres and improved lug ergonomics. The high-contrast dial with white numerals and indices displays the triangular index at 12 o'clock, which has become a signature design detail of IWC's Pilot's watches. Luminous elements on the dial and the rhodium-plated hands ensure great readability in all lighting conditions.

The new reference is equipped with the IWC-manufactured 32111 calibre. This newly engineered automatic movement uses a bidirectional pawl winding system to build up a power reserve of 120 hours. In addition, the front glass of the watch is specially secured against sudden

drops in air pressure. Another practical feature is IWC's EasX-CHANGE® quick-change system\*, which allows to change the strap or bracelet easily without needing additional tools. Furthermore, the Mark XX is now certified as water-resistant to 10 bars, making it the perfect companion for any adventure.

Following the introduction of the Pilot's Watch Mark XX in stainless steel with a black or blue dial (Ref. IW328201 and IW328203), IWC now completes the collection with four new references:

- **Ref. IW328202:** stainless steel case, black dial, rhodium-plated hands, stainless steel bracelet
- **Ref. IW328204:** stainless steel case, blue dial, rhodium-plated hands, stainless steel bracelet
- **Ref. IW328205:** stainless steel case, green dial, rhodium-plated hands, brown calfskin strap
- **Ref. IW328206:** stainless steel case, green dial, rhodium-plated hands, stainless steel bracelet

The Pilot's Watch Mark XX is available immediately through IWC boutiques, authorised retail partners or online at IWC.com. Additionally, it is eligible for registration under the My IWC care program, benefitting from a 6-year extension to the standard 2-year International Limited Warranty.

\* EasX-CHANGE® is a trademark of IWC Schaffhausen and is registered in many jurisdictions worldwide.

## IWC SCHAFFHAUSEN

IWC Schaffhausen is a leading Swiss luxury watch manufacturer based in Schaffhausen in the north-eastern part of Switzerland. With collections like the Portugieser and the Pilot's Watches, the brand covers the whole spectrum from elegant to sports watches. Founded in 1868 by the American watchmaker and engineer Florentine Ariosto Jones, IWC is known for its unique engineering approach to watchmaking, combining the best of human craftsmanship and creativity with cutting-edge technology and processes.

Over its more than 150-year history, IWC has earned a reputation for creating professional instrument watches and functional complications, especially chronographs and calendars, which are ingenious, robust, and easy for customers to use. A pioneer in the use of titanium and ceramics, IWC today specialises in highly engineered watch cases manufactured from advanced materials, such as coloured ceramics, Ceratanium®, and titanium aluminide.

A leader in sustainable luxury watchmaking, IWC sources materials responsibly and takes action to minimise its impact on the environment. Along the pillars of transparency, circularity, and responsibility, the brand crafts timepieces built to last for generations and continuously improves every element of how it manufactures, distributes, and services its products in the most responsible way. IWC also partners with organisations that work globally to support children and young people.
