
THE IWC SCHAFFHAUSEN INGENIEUR AUTOMATIC 35 WITH A 35 MM CASE DIAMETER

Schaffhausen/Geneva, 1st April 2025: IWC Schaffhausen launches the Ingenieur Automatic 35 at Watches and Wonders Geneva. With this new automatic model, the Swiss luxury watch manufacturer complements its Ingenieur collection with three 35-millimetre versions. One model is crafted from 18-carat 5N gold featuring a gold-coloured dial, while two come in stainless steel with either a black or a silver-plated dial. The new Ingenieur Automatic 35 offers the same enhanced ergonomics and highly detailed finishing as the 40-millimetre version.

In 2023, IWC Schaffhausen introduced the Ingenieur Automatic 40; a luxury sports watch with an integrated bracelet revisiting the emblematic design of Gérald Genta's Ingenieur SL, Reference 1832, from the 1970s. This year, the Swiss luxury watch manufacturer extends the collection with the Ingenieur Automatic 35. This new and more compact automatic model has a case diameter of 35 millimetres and a thickness of just 9.44 millimetres.

The **Ingenieur Automatic 35** is available in three versions. One model features an 18-carat 5N gold case and bracelet, completed with a gold-coloured dial (Ref. IW324903). Two models feature a stainless steel case and bracelet. The first one has a silver-plated dial (Ref. IW324901), the second one a black dial (Ref. IW324906).

ENHANCED ERGONOMICS AND HIGH-END FINISHING

Despite its more compact size, the Ingenieur Automatic 35 features all the characteristic design cues of the IWC Ingenieur. Among these are the bezel with five functional screws, the integrated bracelet attaching via its middle links and the "Grid" dial with applied indices. Designers and engineers worked hand-in-hand to define, proportion and finish every part and characteristic of the Ingenieur faithfully to a 35-millimetre case size. The result offers the instantly recognisable look and feel of the Ingenieur in a smaller and flatter execution with perfect ergonomics and wearing comfort.

Just as the 40-millimetre version, the Ingenieur Automatic 35 impresses with its highly detailed finishing. The three new models are finished with a combination of satin-finished and polished surfaces, adding texture and reflecting the light beautifully. Secured to the case ring with five functional screws, the bezel is satin-finished with a polished outer edge. The H-links of the bracelet are also satin-finished with polished edges, while the centre links and case back are fully polished.

CHARACTERISTIC DIAL WITH "GRID" STRUCTURE

A hallmark feature of the Ingenieur Automatic 35 is its elaborately crafted dial. It features the characteristic "Grid" pattern, consisting of small lines and squares. Another detail is the intricate framing of the date window. The appliques on all three models are individually mounted by hand and filled with Super-LumiNova®. While the 18-carat 5N gold version features solid gold appliques and gold-plated hands, the two stainless steel models boast steel appliques and rhodium-plated hands.

SEE-THROUGH SAPPHIRE GLASS CASE BACK

All three versions of the Ingenieur Automatic 35 have been equipped with open case backs showcasing the 47110 calibre with automatic winding and a power reserve of 42 hours. The movement is finished with circular graining and Geneva stripes and features a gold-plated oscillating weight.

INGENIEUR AUTOMATIC 35

REF. IW324903 / REF. IW324901 / REF. IW324906

FEATURES

Mechanical movement – Date display – Central hacking seconds – See-through sapphire glass back

MOVEMENT

Calibre	47110
Frequency	28,800 vph / 4 Hz
Jewels	23
Power reserve	42 h
Winding	Automatic

WATCH

Materials	Ref. IW324903: 18-carat 5N gold case, gold-coloured dial, 5N gold appliques and gold-plated hands, integrated 18-carat 5N gold bracelet with butterfly folding clasp Ref. IW324901: Stainless steel case, silver-plated dial, rhodium-plated hands and appliques, integrated stainless steel bracelet with butterfly folding clasp Ref. IW324906: Stainless steel case, black dial, rhodium-plated hands and appliques, integrated stainless steel bracelet with butterfly folding clasp
Glass	Sapphire, convex, antireflective coating on both sides
Water-resistant	10 bar
Diameter	35 mm
Height	9.4 mm

IWC SCHAFFHAUSEN

IWC Schaffhausen is a leading Swiss luxury watch manufacturer based in Schaffhausen in the north-eastern part of Switzerland. With collections like the Portugieser and the Pilot's Watches, the brand covers the whole spectrum from elegant to sports watches. Founded in 1868 by the American watchmaker and engineer Florentine Ariosto Jones, IWC is known for its unique engineering approach to watchmaking, combining the best of human craftsmanship and creativity with cutting-edge technology and processes.

Over its more than 150-year history, IWC has earned a reputation for creating professional instrument watches and functional complications, especially chronographs and calendars, which are ingenious, robust, and easy for customers to use. A pioneer in the use of titanium and ceramics, IWC today specialises in highly engineered watch cases manufactured from advanced materials, such as coloured ceramics, Ceratanium®, and titanium aluminide.

A leader in sustainable luxury watchmaking, IWC sources materials responsibly and takes action to minimise its impact on the environment. Along the pillars of transparency, circularity, and responsibility, the brand crafts timepieces built to last for generations and continuously improves every element of how it manufactures, distributes, and services its products in the most responsible way. IWC also partners with organisations that work globally to support children and young people.
