
NEW POOL DIAL COLOR GIVES THE INGENIEUR AUTOMATIC 35 A VIBRANT EXPRESSION

Schaffhausen, 6 July 2026: IWC Schaffhausen presents a new variant of the Ingenieur Automatic 35 featuring an eye-catching dial in a new shade called Pool. Refreshing and aquatic, this new color casts the Ingenieur's signature clean architecture in a new light. The 35-millimeter stainless steel case and integrated bracelet ensure high wearing comfort, while an elaborate combination of satin-finished and polished surfaces plays beautifully with light at any hour of the day – or night.

In 1976, legendary Geneva artist and watch designer Gérald Genta created the Ingenieur SL, Reference 1832. Revolutionary for its purity of form and the boldness of its presence, it announced the birth of an entirely new product category within the watch industry. Half a century on, the stainless steel luxury sports watch with an integrated bracelet has lost none of its luster.

In 2023, IWC Schaffhausen brought back Gérald Genta's visionary design with the Ingenieur Automatic 40. While honoring the original's distinct aesthetic, the model was comprehensively re-engineered to meet the highest standards of ergonomics and finishing. The Swiss luxury watchmaker has since then continuously expanded the collection. A milestone came with the Ingenieur Automatic 35 – a more compact model in a 35-millimeter case size. Now, IWC Schaffhausen adds a new chapter with a surprising Pool-colored dial.

The **Ingenieur Automatic 35** (Ref. IW324902) features a 35-millimeter case and integrated bracelet crafted in robust and durable stainless steel. Its centerpiece is the dial in a fresh new color called Pool. As it is characteristic of the Ingenieur, the dial carries the signature "Grid" pattern consisting of small lines and squares that lends it striking visual depth. Rhodium-plated hands and applied indices filled with Super-LumiNova® provide elegant contrast and ensure easy legibility in low light conditions. The distinctive bezel, another defining design code of the Ingenieur, is secured to the case ring

by five functional screws. Finally, the bracelet, which attaches via the middle links, improves the ergonomics and offers a supple and comfortable fit on the wrist. The "Probus Scafusia" featured on the crown underlines IWC's unwavering commitment to craftsmanship and manufacturing excellence.

"Our new Pool color is a fresh, radiant aquatic shade that feels made for summer – and it brings a surprising and vibrant new expression to the Ingenieur. The dial captures light in a beautiful way, and it perfectly complements the clean lines and the refined proportions of the Genta-inspired integrated bracelet design," explains Christian Knoop, Creative Director at IWC Schaffhausen.

A FASCINATING PLAY OF LIGHT ACROSS EVERY SURFACE

The Ingenieur Automatic 35 leaves nothing to be desired in terms of finishing. The watch skillfully combines different surface treatments to achieve a beautiful interplay of light during the day and at night. Both the case and bezel feature satin-finished and polished surfaces, while the bracelet's center links are polished against satin-finished H-links. A sapphire crystal case back reveals the Caliber 47110 within. The automatic movement with a 42-hour power reserve is decorated with circular graining and Geneva stripes and also features a gold-plated oscillating mass.

**THE 35-MILLIMETER COLLECTION
NOW SPANS SIX MODELS**

At Watches and Wonders in Geneva, IWC introduced the Ingenieur Automatic 35 (Ref. IW324911) with a diamond-set 18-karat 5N gold bezel, and the Ingenieur Automatic 35 (Ref. IW324907) with a deep blue dial. These three models complete a collection that originally comprised the Ingenieur Automatic 35 in stainless steel with a silver-plated dial (Ref. IW324901) and a black dial (Ref. IW324906), as well as one edition crafted entirely in 18-karat 5N gold and featuring a gold-colored dial (Ref. IW324903).

INGENIEUR AUTOMATIC 35

REF. IW324902

FEATURES

Mechanical movement – Date display – Central hacking seconds – See-through sapphire glass back

MOVEMENT

Caliber	47110
Frequency	28,800 vph / 4 Hz
Jewels	23
Power reserve	42 h
Winding	Automatic

WATCH

Materials	Stainless steel case, Pool-colored dial, rhodium-plated hands and appliques, integrated stainless steel bracelet with butterfly folding clasp
Glass	Sapphire, convex, antireflective coating on both sides
Water-resistant	10 bar
Diameter	35 mm
Height	9.4 mm

IWC SCHAFFHAUSEN

IWC Schaffhausen is the Engineer of Watchmaking. In 1868, the American watchmaker and engineer Florentine Ariosto Jones established the 'International Watch Company' in Schaffhausen in the German-speaking part of Switzerland. By combining the best of human craftsmanship and creativity with cutting-edge industrial technology and processes, he laid the foundation for IWC's unique engineering approach to watchmaking.

IWC's distinctive and pure design is brought to life through collections ranging from elegant dress watches to sports and luxury sports watches, notably the Portugieser, Portofino, Pilot's Watches and Ingenieur. Over its more than 150-year history, IWC has earned a reputation for creating professional instrument watches and functional complications, especially chronographs and calendars, which are ingenious, robust and easy to use.

A pioneer in the use of titanium and ceramic, IWC specialises in performance materials such as Ceratanium®. IWC's advanced engineering division XPL develops technologies that enhance the durability of mechanical watches and extend their applications to environments with extreme conditions such as jet aviation and human spaceflight.

IWC is a leader in luxury watchmaking, crafting timepieces built to last for generations and continuously improving every aspect of how it manufactures, distributes and services its watches responsibly. Empowering the next generation of engineers, the brand also partners with organizations that work globally to support children and young people. **IWC. Engineered™.**
